

DREAM CENTRE

HEALTH CARE- FORUM- FEB 11, 2025

BACKGROUND

- DREAM Centre- Nairobi is a project run by the Daughters of Charity of St. Vincent De Paul.
- The Daughters of Charity operates the DREAM program in 6 African Countries (Mozambique, Nigeria, Kenya, Tanzania, Cameroon and Congo).
- The DREAM program in Nairobi was launched in 2008. DREAM is acronym for:
 - D- Drug
 - R- Resource
 - E- Enhancement against
 - A - AIDS and
 - M- Malnutrition
- The program has grown since its inception from providing services approximately to 100 patients to 3328 patients as at January 2025.
- We partner with the Community of Sant'Egidio – Rome. The community provides technical support and DREAM Software.

MISSION & VISION

- **VISION**

- DREAM envision a world where people living with HIV and AIDS have access to holistic and appropriate treatment and are treated with respect and their dignity upheld.

- **MISSION**

- To ensure free access to high quality care and treatment service to people living with HIV and AIDS without discrimination, irrespective of ethnic or regional origin, religion or gender, through a comprehensive and holistic approach.

UPTAKE OF SERVICES :PROGRAM PERFORMANCE

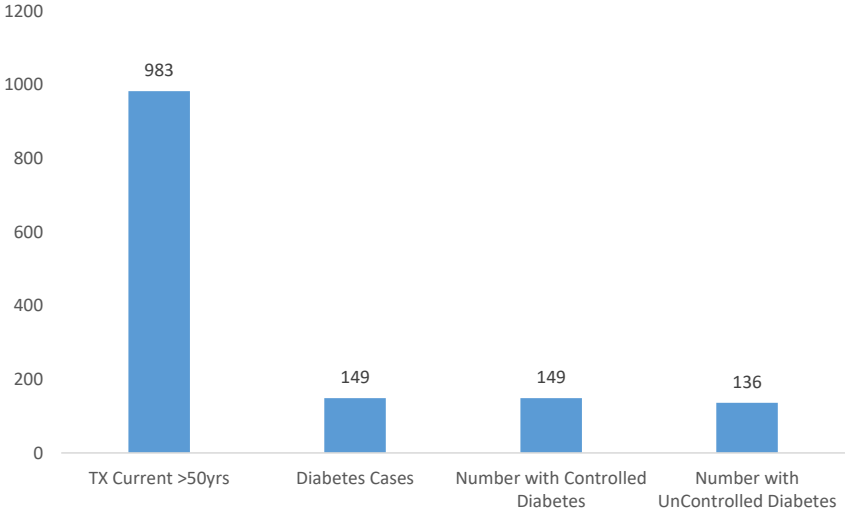

Indicator	Children (Age 0-9)	Adolescents (Age 10-19)	Adults (Age 20+)	Overall
PLHIV current in care	26	224	3072	3322
PLHIV current on ART	26	224	3072	3322
ART Uptake (%)	100%	100%	100%	100%
HIV Positivity (%)				4.1%
Mothers new in ANC knowing their HIV status (%)				100%
Identified HIV+ pregnant women on HAART (%)				100%
New and relapse TB cases knowing their HIV status (%)				100%
TB-HIV Co-infected clients on ART (%)				100%
HIV clients current in care screened for TB (%)	26(100%)	218(97%)	2873(94%)	94%
Cumulative number of clients on ART Ever on IPT	26	223	3045	3294
IPT Uptake against clients current on ART (%)	100%	100%	99%	99%
VL Uptake (%)	92%	98%	96%	96%
VL Suppression Rate (%)	100%	95%	97%	97%
GENG GBV Screening		100%	100%	100%
GEND GBV Positive Cases		0	99	99%

NON COMMUNICABLE DISEASES

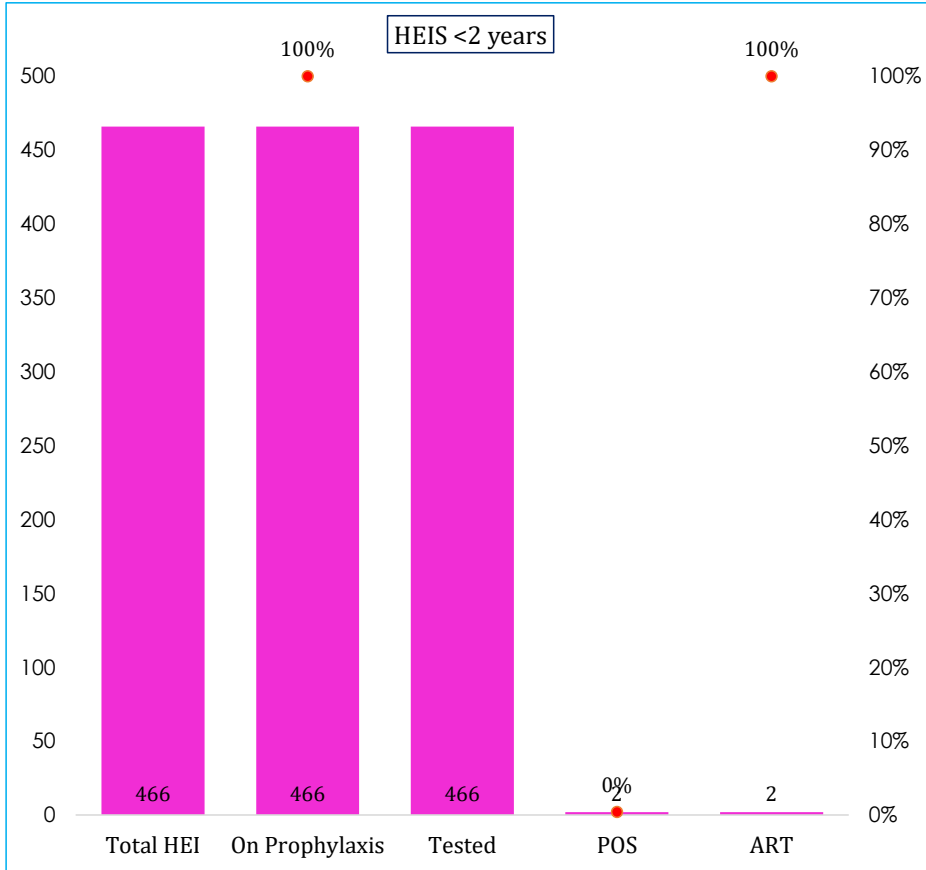

Hypertension

Diabetes

HEI GRADUATION-2024

SIGNIFICANT CHANGES

- <2% MTCT rate
- 100% TB Cure rate
- 97% Viral load suppression
- 95% Retention rate among PLHIV
- <1% Mortality among PLHIV-NCDs
- 100% Linkage Rate to ART
- 100% Linkage rate of High Risk HIV Negative clients to Prevention Services

CHALLENGES

- Point of Care CD4 Machine and Reagents
- Mortality cases are contributed by NCDs hence a need for drugs and reagents
- Decreasing of funds causes instability
- Poor social economic status of most of our clients-Nutrition

Thank You
